

BOARD OF TRADE ELECT OFFICERS

A meeting of the Carbon Board of Trade was held in the Municipal office on Monday night, Aug. 29, when a fair representation of the business men were present. Officers for the year were elected as follows:

President, J. A. MacDonald
Vice-Pres., J.R.E. Coburn
Secretary, S.F. Torrance.
Councillors, P. Edwards and A.F. McKibbin.

Honorary members, Mr. Gordon and Mr. Barker.

The date for the regular monthly meeting was set for the second Monday in each month.

A fee of \$1 is to be charged all members of the Board of Trade. A committee composed of P. Edwards and A.F. McKibbin was appointed to canvas the town for members.

The matter of holding the annual supper came before the meeting and arrangements will be made for this event at the next meeting.

Discussion regarding the keeping open of the stores in the evenings during harvest came up and a petition is to be presented by P. Edwards and A.F. McKibbin to the Village Council at their next meeting requesting the alteration of the by-law governing the closing hour.

Considerable discussion also arose on the matter of a new bank building in Carbon and a resolution was adopted to be presented to the Superintendent of the Bank of Montreal that a new bank building be erected in Carbon. The committee appointed to look after this matter was composed of Messrs. Edwards, McKibbin, Greenan and MacDonald.

J. A. TOOMBS WILL TAKE POST-GRADUATE COURSE

J.A. Toombs, optician at Carbon, left on Monday for Calgary, where he will take a Post Graduate course in optical work, under the direction of Dr. Skeffington, the great American optometrist who is recognized by the Alberta Optometric Association and under which association he is working. With the influence of this course Mr. Toombs will be well prepared to handle all the optical work in the town and district, when he will have the very latest and modern methods of the optical trade.

The annual Fashion Show, in connection with Tony's Ladies' Wear Store, will be held at the Napier theatre, Drumheller, showing all the latest creations of ladies apparel on living models. In conjunction, the special show, "Fashions for Women," will feature Esther Ralston, in all the latest creations for women. This picture will be shown exclusively on the night of the fashion display, Friday, September 2nd.

The official fall opening at Tony's Ladies' Wear Store will be on Saturday, Sept. 3rd, when some real values in spring and summer goods will be offered for sale. See the ad on back page of this issue.

The matter of building a community hall in Carbon also came up for discussion and a committee composed of C.H. Nash, P. Edwards, A.F. McKibbin and J.A. MacDonald was appointed to go fully into the matter and see what could be done in this respect.

MRS. JOHNSON DIES IN CALGARY

Mrs. Geo. Johnson, a one-time resident of Carbon, died at the home of her daughter, Mrs. Long, in Calgary on Monday evening at 8 p.m.

The late Mrs. Johnson was 81 years of age and leaves to mourn her loss three sons and two daughters, Mrs. Long of Calgary, and Mrs. S.N. Wright of Carbon.

Funeral services were held in Carbon on Wednesday afternoon from the United church and were conducted by the Rev. C.B. Oakley. The large crowd attending the services at the church and at the graveside and the beautiful array of flowers gave evidence to the high esteem of the Carbon citizens towards the deceased.

The pallbearers were: Messrs R. Van Loon, L.B. Hart, Brock Elliott, C.M. Stenberg, W. White and L. Hay. Interment was made in the Carbon cemetery.

Castella-McEwan

A quiet wedding was solemnized in Calgary on Tuesday, Aug. 23, when Miss Peggy McEwan of Carbon and Mr. A. Castella, also of Carbon, were united in marriage. The bride was attended by Miss Margaret Matchett of Rockyford and the groom was supported by his brother, H. Castella of Standard. The happy couple will make their home 12 miles north of Carbon, where Mr. Castella farms a large acreage of land.

R.H. Purdy and M. Roberts motored to Drumheller on Thursday.

EIGHTH FORTNIGHTLY ALBERTA CROP REPORT

The whole province gives promise of an excellent crop with high average yields of all kinds of grain. Late seeding, with abundant moisture in the early part of the season, is responsible for the somewhat late ripening of the general crop.

The warm sunshine we have had this last week is ripening the crops with great rapidity. The earlier varieties of wheat, particularly that sown on lighter land, are now mature and a considerable amount of cutting of this grain has already been done. Cutting will not be general, however, until the first week of September.

A careful check-up of the frost situation shows that there has been no frost damage except in the extreme northeastern section of the province. In some isolated districts in this area frost struck rather heavily. Except in the above area the province is entirely free from frost damage. Hail damage has been more prevalent than usual with the result that damage from this source will be slightly greater than average.

Notwithstanding the losses caused by the above mentioned agencies if no further serious losses occur, we are convinced that the province will have the largest total yield of wheat in its history. A particularly significant feature this year is to be found in the fact that there is a uniformly good crop in every section of the province.

Mr. and Mrs. Torrance, Mr. and Mrs. Fairbairn and the children were visitors to Drumheller on Saturday.

LITTLE ITEMS OF LOCAL INTEREST

Messrs. Fred Poxon and Harry Elliott motored to Calgary on Sunday to meet Mrs. Elliott and Mrs. Smith, who were returning from a six weeks holiday spent at Coast points.

J. A. Toombs was a visitor to Drumheller on Friday.

Mr. and Mrs. L. Poxon returned to Carbon on Friday after spending a week in Edmonton.

Mrs. H.A. English and daughters returned on Monday after spending the past two months visiting with relatives at the Pacific coast.

Lawrence and Alex Poxon were visitors to Calgary on Sunday, returning Wednesday.

Mr. S. E. Peters returned to Carbon on Sunday, after spending the summer at his old home town in Ontario.

J. A. MacDonald and R. English motored to Calgary Sunday.

R. J. Fairbairn motored to Calgary on Thursday and returned Friday, accompanied by his two nieces, the Misses Orr.

Desiring to lower a St. Petersburg, Fla., Bandstand floor, consisting of a 16 ton concrete slab, to a new base 18 inches below, the contractor found he had no satisfactory screw jacks. So he placed twenty-two 50 pound cakes of ice under the slab, removed the supports, and the sun did the rest.

Trees In Western Canada

In the great nation building work of settling the vast plains of Western Canada one objection to overcome with many intending settlers, especially from Ontario and other countries where woods and forests prevailed, was the lack of trees. To those accustomed to living in a tree country, the bare prairies with their unbroken stretches as far and farther than the eye could reach, presented a barren, uninviting appearance. There was not only a lack of that readiness and beauty which trees provide, but an absence of protection from the elements when high winds prevailed, the snows drifted, and blizzards occasionally blew.

During the earlier days in the settlement of the West, many home seekers travelled long distances from the area traversed by the railway to find locations in districts where there were trees because, what they wanted, was not a mere temporary place where they could "mine" the soil for a time, make some ready money quickly, and then get out, but a new and permanent home for their children where they would have a better opportunity in life than in the lands from which they had come. They put up with inconveniences inseparable from their isolated locations solely because they preferred the wooded districts to the open, seemingly unattractive prairies.

In those early days, however, thousands of people came and took up homesteads who had no intention of establishing permanent homes. They were speculators, more or less indifferent to their surroundings, concerned only with the making of money as rapidly as possible. They were quite frank in admitting they had no thought of making the West their home for the remainder of their lives, but that, on the contrary, they were using it as a half way house, a stepping stone to some other and better place. Many came with the idea of making money which they could not accumulate in their old Eastern homes and then returning there to live and ultimately die.

Some years ago the fact was borne into the minds of the Federal Government that the problem of peopling the West was not so much one of immigration as of colonization; not so much the obtaining of settlers as the retaining of them once they had come. In a word, the real problem was how to get people to regard the West as a place of permanent residence; how to get people to establish homes rather than mere dwelling places.

It came to be realized that a farm house, stables and barns set down in the midst of a flat prairie, utterly lacking in anything approaching beauty or location and surroundings, could never appeal as a "home," and could never inspire in the minds and hearts of children that affection which the parents still retained for the old homes they had left. And it was realized that what was needed to convert these prairie dwelling places into real and permanent homes was "trees."

There was an impression abroad, however, that trees would not grow; if they would, why was not the prairie country covered with them as was the case in other lands of vast virgin areas. But this was not a convincing answer, and it was argued that if trees would grow elsewhere, they would grow on the rich, fertile plains of the West. And, always, some enterprising settlers soon proved that this was so.

The problem of getting trees, getting them in large numbers and cheaply, because these early settlers had little money to spend, and just the right way to plant and cultivate them, still existed. Then the Dominion Government inaugurated one of the finest of its many splendid services for agriculture when it established forestry farms in the West.

These farms have worked a veritable revolution in the appearance of this Western country. Established, as they were, on the bare prairie, in a few years they were converted into miniature forests. From them have gone forth millions of trees, distributed free of charge to farmers all over the West. Experts have advised on tree culture, farmers have been inspired, advice on planting given. Today, hundreds and thousands of Western farm dwellings have been transformed into homes of real attractiveness and beauty to which their owners and their children have become permanently attached and for which a real love is now manifested. Trees have proven a great and effective agent of colonization, while at the same time providing shelter for stock, protection for gardens, and a comfort to all when strong winter winds sweep across the land.

Prairie cities, towns and villages have caught the spirit and learned the lesson taught by these forestry farms, and formerly wholly unattractive places, as, for example, the capital city of Saskatchewan, whom nature failed to endow with any of her assets, have become places of real beauty which are a source of pride and delight to their residents, and of surprise and pleasure to visitors from afar.

The Federal Government is deserving of all praise for its forestry farms and tree planting policy, and to an ever increasing extent it is to be hoped the people of Western Canada will second the efforts of the Government and even more energetically prosecute the work of surrounding their homes with trees.

Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother, Fletcher's Castoria has been in use for over 25 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food, giving natural sleep without opiates.

The genuine bears signature of

Chas. H. Fletcher.

New Use For Alarm Clocks

Warn Topeka Business Men Of Time Limit For Parking

The alarm clock, faithful servant of the American home, now is employed as a warning that the business man's automobile has been parked long enough, and that it's time to move on.

With a two hour parking limit in the business section of Topeka, Kansas, business houses have installed alarm clocks in their offices. At the end of two hours the alarm rings. A man gets up, burries out and moves all the automobiles belonging to employees. The alarm is set ahead two hours and the performance repeated. So it goes through the day.

Speed Hard To Imagine

Expect English Racing Plane Will Travel 300 Miles An Hour

Some weeks ago an English army officer, in a speed test on a Florida beach, drove his car at a speed of 207 miles an hour. This is the greatest rate of travel ever made in any sort of machine driven on land or sea. But it is reported that an airplane has been made in England for a forthcoming race which can develop a speed of 300 miles an hour.

It is not easy to realize what it would mean to travel at such a rate of speed. The fastest express trains rarely go faster than sixty or seventy miles an hour. Three hundred miles an hour is a speed greater than the average velocity developed by a human being falling from a great height. The French aviator Jean van Lier, flying over Beaumont-sur-Oise, got into difficulties at an altitude of more than four miles, and jumped with his parachute from the machine. The parachute did not open until he was only 300 feet from the ground, but in time to save his life. From the moment he jumped until the moment the parachute opened he fell four miles in about seventy seconds. That is at the average rate of 294 miles an hour. And the mystery plane will, it is said, be capable of a speed 50 per cent greater than that!

Paint a Corn With This Marvel Liquid

The pain stops in a few seconds. Tight shoes won't hurt anymore. The Corn shrivels up, and drops off. Removes the whole corn and doesn't pain a bit. It's the sure remedy—Putnam's Corn Extractor. All druggists sell Putnam's Corn Extractor. Get your bottle today. Refuse a substitute for Putnam's.

Waterpower Resources

The official information available at a central source regarding the water power resources of Canada, as to capacity, and availability is most complete. The Index Inventory System of investigating and recording waterpower resources, originated by the Dominion Water Power Branch of the Department of the Interior and developed and carried out in full collaboration with the provincial governments, has resulted in all possible information on this subject respecting any river or district being available at the head office in Ottawa for any interests concerned.

The Many-Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

Growing Tobacco In B.C.

Experimental crops of tobacco are being grown on 65 acres of land at Oliver, B.C. Fifty acres have already been planted to the satisfaction of Mr. McVittie, of the B.C. Tobacco Products. Good progress has been made and the prospect is promising.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

Historic Memorials

Massive Fortress Of Fort Lennox On the Richelieu River

Among the historic memorials of Canada that have been from time to time placed under the care of the Canadian National Parks Branch of the Department of the Interior there is none richer in historic interest or more charmingly situated than the massive old fortress, Fort Lennox, that stands in quiet dignity on the southern end of Ile aux Noix in the Richelieu river, in the province of Quebec. This fortress was erected by the British military authorities in the early part of the nineteenth century and since its abandonment as a military post in 1869 has been visited by increasing numbers of tourists each year.

Britishers For Prairies

T. O. F. Herzer, manager of the Canada Colonization Association, states that this organization has placed 400 Old Country families in the Prairie Provinces this year and that 800 other families will arrive before the end of the year.

WHEN USING WILSON'S FLY PADS

READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

There is only one way to kill all the Flies

This is it—Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not flooded) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.

Put the plates away out of the reach of children until required in another room.

The right way to use Wilson's Fly Pads

Fair Dates For 1928

Western Association Of Exhibitions Hold Meeting In Regina

At a meeting of the executive of the Western Canada Association of Exhibitions, held in Regina, recently, dates for the coming year were arranged as follows:

Brandon, July 2 to 6; Calgary, July 9 to 13; Edmonton, July 16 to 21; Saskatoon, July 23 to 28; and Regina, July 30 to Aug. 4.

A meeting of the executive will be held in Toronto to interview Hon. W. R. Motherwell in regard to grants and other matters of common interest.

The various fair associations were represented by the following men:

From Regina, H. G. Smith, J. R. Martin, D. T. Elderkin and J. F. Robinson; from Saskatoon, Robert Thomas, Archie Wilson, Sheriff Calder, and S. W. Johns; from Brandon, William Dowling, Archie McPhail, J. E. Bertie and J. A. Chapman; from Calgary, N. S. Christie, E. D. Adams and E. L. Richardson; from Edmonton, W. J. Stark was the only representative. President Nat Christie presided.

Wins Premier Prize

The Shorthorn bull, King of the Fairies, recently sold from the Canadian ranch of H. R. H. the Prince of Wales to a United States breeder, again won the premier prize at the Calgary Exhibition. The "King's" son, Prince of the Fairies, however, lost out and had to veil his crest to Colyn White Ensign, belonging to T. A. Russell, of Toronto.

For corns and bunions use Minard's Liniment.

A kiss causes palpitation of the heart and shortens life three minutes, students in Western State College in Colorado have discovered. Thus 480 kisses would eliminate a full day of one's life.

Leaves Valuable Estate

An estate provisionally valued at £1,041,612 gross, was left by the fifth Marquis of Lansdowne, former governor-general of Canada, who died at Clonmel, Ireland, in June. It was shown by his will recently. The widow and the present marquis are the beneficiaries.

WEAK AND NERVOUS

The Condition Of a P. E. I. Lady Who Again Rejoices In Good Health

"I can most heartily recommend Dr. Williams' Pink Pills to all weak people," says Mrs. Augustin Arsenault, Wellington Station, P.E.I. "Before I began their use I was very weak and nervous. I had always worked hard, with no thought of my health, until suddenly my strength left me. I began to feel tired and depressed, and did not sleep well at night, feeling just as tired in the morning as when I went to bed at night. I began to feel discouraged when I would think of the work necessary for me to do. I got some medicine from the doctor whom I consulted, but it did not appear to meet my case as I showed no improvement while taking it. Then a neighbor advised me to try Dr. Williams' Pink Pills and I got a supply of this medicine. I very soon found they were helping me, and I continued their use until I was well again, and I have been strong and well ever since."

Dr. Williams' Pink Pills do one thing and do it well. They build up, purify and enrich the blood, and as the blood supplies the whole body, new life is given to the entire system. Better sleep, steady nerves, improved appetite, increased vigor—all these can be yours by taking Dr. Williams' Pink Pills. Begin today. Sold by all medicine dealers or by mail, post paid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

More buildings were started in Canada in the first four months of this year than in the same period of the past seven years.

The Carbon Chronicle

E. J. ROULEAU, Publisher

Printed every Thursday at Carbon, Alta.
\$2.00 a year**THE APPOINTED HOUR**

What is wrong with the citizens of Carbon? Every time a meeting of any kind is called for a certain hour, it is generally from half to three quarters of an hour before anyone arrives for such meeting.

Some come on time and finding no one there go away, thinking there will be no one around. And we wonder why it is that our public meetings are so poorly attended.

This has been the case at the meeting of the Curling Club last week, when they did not start till 8.40 and again on Monday night at the Board of Trade meeting when there was no one around at 8.30. It is practically useless for the people of Carbon to try and do anything useful in the town if this state of affairs keeps up. But will there ever be a change? It is up to the citizens themselves, and to each individual to see that he or she is there at the appointed hour. Then and not before will the spirit of co-operation prevail, and the people unite to work for one good, the good of our town and country.

APPLE SAUCE

A bird in the hand isn't to be compared with a chicken in the arms.

The chief trouble with a flat tire says the Office Vamp, is that it never has any blow-out.

Speaking of these short skirts, it's not the initial length, it's the up-creep.

Bobbed hair, bobbed skirts, bobbed brains.

Some motorists make a "grave" mistake when they try to beat the train to the crossing.

Oh what a cute tie, I wish I had a dress made of that.

Speaking of cigarettes, "Let the rest of the world go buy."

Wife—You simply can't find help that is honest. That one you recommended just left suddenly and took with her nine of my towels.

Husband—what kind were they? Wife—They were those C.P.R. towels which I brought back from my trip.

Royal Train Is Canadian Pacific's Finest

1. The lounge room on the Prince's car "Strathcona." 2. Interior of lounge section of the "Mount Stephen," one of the private cars at the disposal of the Princes. 3. "2200" type locomotive that will haul royal train during major portion of journey. 4. Section of the Royal train showing the "Wentworth," one of the private cars used by Premier Baldwin.

UNDOUBTEDLY the finest train ever assembled for any occasion bore their Royal Highnesses The Prince of Wales, Prince George, and Premier and Mrs. Baldwin from the Windsor Street Station in Montreal recently on their journey westward across the Continent. From their observation platform at the rear of the "Mount Stephen," where the Prince of Wales will smile his greetings to thousands of Canadians across the Dominion, to the private cars placed at the disposal of Premier Baldwin, the train resembled more in appointment the most exclusive club, finishings and appointments being in every way fitting for such distinguished guests of Canada.

Days before the Empress of Australia, bearing the Princes and Premier to Quebec, steamed up the

grey waters of the St. Lawrence, the yards of the Canadian Pacific were a scene of more than usual activity, interest centering around the Royal train being assembled there. The finest private cars of the Company were assembled, the Mount Stephen and the Strathcona for Their Royal Highnesses, and the Wentworth and the Killarney for Premier and Mrs. Baldwin. The Rupertsland and the Van Horne were placed at the disposal of Premier King and members of the Princes' party. The Mount Stephen used by the Princes as their dining room and also as a general lounge car is finished in walnut, the glassware and silver fittings being set off by blue toned rugs, hangings and upholstery. The Strathcona, containing the sleeping quarters of the

Prince of Wales and Prince George, is also finished in dark walnut. The coverings of the beds are all in royal blue while those of their aides-de-camp are in water blue of a shaded silk. Premier Baldwin's private cars, located near the front of the train, are furnished in the same manner, supplied with radio and Orthophonic. The Wentworth is finished in mahogany while the Killarney is in walnut.

In addition to the private cars are a number of compartment Glen cars for the use of officials and others who will accompany the train across the continent. The most powerful locomotives in use on the C.P.R. will haul the special train during the major part of the journey across Canada to the Rockies, this being the G-3-d type of the 2300 class.

Highland Musical Festival

100 Medals Offered As Prizes At Game Contest and Musical Festival At Banff

Under the patronage of His Royal Highness, the Prince of Wales, Canada will hold National Scottish Games and Music Festival at Banff in the Canadian Pacific Rockies, September 3 to 5.

The event is being planned on a most ambitious scale and promises to be a most elaborate affair. Each of the seventeen Highland regiments in Canada will send a piper to compete for the trophy offered by Mr. E. W. Beatty, President of the Canadian Pacific Railway for the best regimental piper in the Dominion.

Scottish music by folk-singers and famous Scottish Concert artists, will attend, among whom will be Davidson Thomson, Ruth Matheson, J. Campbell McInnes and Jeanne Dunsen.

The Highland Tribes of Indians in the Rockies will take part in the festival of song and dance. Their totemic emblems and gay native costumes will vie with the Highlanders of Scotland for attraction.

A very attractive booklet has been issued by the Canadian Pacific Railway in connection with the event copies of which are available on application to the ticket agent.

Not Worn Out Yet

The French scientist Charles Nordmann estimates that the sun will continue to give the world its heat and light for 150,000,000,000 years. The calculation was made possible by the discovery of the construction of the atom. This eliminates the old theory that the sun would burn out in 10,000,000 years at the most and reconciles geologists and astronomers, Professor Nordmann says.

A Chic New Frock

Distinctly modish is this attractive frock having a group of plaits at each side of the front and a plain back. In View A contrasting material or all-over lace is used for the vest and insets on the sleeves, and a long collar ties in a chic bow at the side. View B is shown fashioned of one material and has a short collar and loose sleeves with the insets omitted. No. 1613 is in sizes 36, 38, 40, 42 and 44 inches bust. Size 38 requires 3 1/2 yards 39 inch, or 2 1/2 yards 54 inch material, and 3/4 yard additional 39-inch contrasting for View A. Price 20 cents the pattern.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centers and will help you to acquire that much desired air of individuality. Price of the Book 10 cents the copy.

FIRESTONE OFFICIALS

Top row, left to right: W. A. Pope, sales manager; H. Foreman, assistant superintendent; Russell T. Kelley, advertising counsel; S. S. DuMontin, Firestone Tire and Rubber Company of Canada, Limited.
Bottom row, left to right: C. A. Meyers, chief engineer; Leonard

Firestone, Harvey S. Firestone, Firestone Tire and Rubber Company, Akron, Ohio; Earl W. BeSaw, vice-president and general manager, Firestone Tire and Rubber Company of Canada. Mr. Firestone announced an important addition to the Hamilton plant.

FIRESTONE PLANT TO BE ENLARGED SHORTLY

Head Of Famous Tire Corporation Makes Announcement—Founder Of Industry With Son, Visited Hamilton

One of the most important visitors to the City of Hamilton during Jubilee Week was Harvey S. Firestone, president and founder of the Firestone Tire & Rubber Company of Akron, Ohio, and also of the Firestone Tire & Rubber Company of Canada, Limited. Mr. Firestone was accompanied by his son Leonard, and Mr. Meyers, chief engineer for the company.

The visit marked the fifth anniversary of the start of manufacture of Firestone run-dipped tires in Canada. Mr. Firestone declared that he was extremely impressed with the industrial growth of Hamilton, and of Canada generally, and with the progress of the Canadian Firestone company. As the Canadian Firestone company was organized during trying times, he had not anticipated such rapid growth.

Mr. Firestone congratulated Hamilton upon the celebration of the Diamond Jubilee of Confederation and predicted that, with the resources behind it, Canada would experience many more years of industrial prosperity.

As a fifth birthday present to the city the President of the Firestone Company announced that instructions had been issued for the enlargement of the local plant to increase its capacity 35 per cent. As the firm employs between 600 and 700 men normally this probably will mean adding between 200 and 300 men to the pay roll. The plant has been in continuous operation from 18 to 24 hours a day for the past five years and has an annual pay roll of \$1,500,000. Mr. Meyers remained behind to arrange for the building program and call for tenders, for the work will commence immediately.

Says United States Faces Grave Situation

Dr. Henry Taylor Quoting Survey Report Believes Farms At Low Ebb

Agriculture is at low ebb in the United States and a food shortage may some day follow a lean crop year if the trend continues, according to Dr. Henry C. Taylor, of the Institute for research of land economics of Northwestern university in a report made public.

The farmer's share of the national income in 1926 was 9.7 per cent., the lowest percentage since records have been kept; 31,000,000 acres of land went out of agricultural use between 1920 and 1925, and there were 441 farm bankruptcies for each working day during 1926, the report states, in support of the statement that the situation is "a menace to the continued prosperity of United States."

The 1926 figure of 9.7 per cent. is to be compared with 29.7 per cent., the average share of agriculture for the five years 1909 to 1913. The high mark for the period was 21.7 per cent. in 1919, and the lowest 20.2 per cent. in 1911, according to the report.

During the past five years, the average share has been 10.3 per cent., or less than half what it was before the war.

The decline of agricultural prosperity has driven people from the land, Dr. Taylor declared.

"The farm population shrank by a matter of 2,000,000 persons between 1920 and 1925," he said, "while the population of the United States as a whole increased by 8,500,000. With the present rate of shrinkage of American agriculture we soon may reach the point in the United States where a poor crop year will mean a substantial shortage of food for the American people."

Sweet and palatable, Mother Graves' Worm Externalizer is acceptable to children, and it does its work surely and promptly.

There are two ways to buy a home on the installment plan. In one case you get a deed; in the other you get rent receipts.

A Valiant Knight

Wilfred T. Grenfell Wins His Spurs On Bleak Labrador Coast

Newfoundland has had its knights—several of them and at different times. Now Labrador has one of its very own, and it is safe to say there is not a worthier one in the ranks of chivalry. In the good old days, it was the custom for knights to ride abroad redressing human wrong, succoring distressed damsels, seeking adventure and destroying tyrants. Nameless and with blanked shields, they went until some exploit of arms gave them the right to show their eschutcheons and proclaim their names.

Labrador's knight, however, has already won his spurs. The tyrants of disease and loneliness, and King Winter, the hardened despot of the north, he has been fighting for quarter of a century. Damsels whom number he has rescued on the rock-bound Labrador coast and adventure he has had no need to seek, for it has met him at every turn. Human wrongs, presumably, he has righted too, for he has long been a magistrate, though his friends say he knows no law. At any rate, he has ameliorated much human suffering and brought brightness into a myriad of lives. The King did honor the other day to the knightly Order of St. Michael and St. George when he enrolled Wilfred T. Grenfell among its members. Vancouver Province.

Oil From Alberta

The total production of crude naphtha taken from the Royaltie well and purchased from other wells in the Turner Valley field during the month of May, 1927, amounted to 22,835 barrels, according to figures published in the July issue of the Metallurgical Bulletin. This total is made up of 18,693 barrels produced by the Royaltie No. 4 well, 757 barrels taken from Royaltie wells Nos. 1, 2 and 3, and 3,385 barrels purchased from other producing wells.

Maltese dogs, the little white-haired animals so popular during Victorian days, no longer are found on their native island.

SUNDAY SCHOOL LESSON

AUGUST 21

COD'S PROMISE TO DAVID

Golden Text:—"Thy throne, O God, is for ever and ever; and the sceptre of uprightness is the sceptre of Thy kingdom."—Hebrews 1:8.

Lesson: 1 Chronicles 17.
Devotional Reading: Hebrews 1:8-12.

Explanations and Comments

1. David Plans To Build a Temple, verses 1, 2.—When David was at peace with his enemies, he began to consider what next he could do for his kingdom. To Nathan, the prophet, he told the plan which he had probably long cherished. He himself was dwelling in a house of cedar, he said to Nathan, but the ark of God was housed under curtains, in a tent made from goat's hair. Compare Haggai's argument for rebuilding the temple, in Haggai 1:4. "David was an old man when he spoke these words, but old age had not chilled him as it so often does. It had not made him cynical nor selfish, as if there were nothing worth caring for but his own comfort. There is the ring of enthusiasm about his words, the note of resolve that nothing could be too splendid to be wished on the house of the Lord of Israel."—E. H. Morrison.

David's plan seemed to Nathan good, and he told the king to do all that he desired to do, for God was with him.

"The Lord demands my best. I will not keep the house of cedar and offer him the fragile tent. He shall have the cedar. I will offer him my best! He shall have the best of my time. So often I give him the rag-end of the day, I give him the moments of weariness, the remnant of the hour when I am quite worn out. I keep the best for business. Henceforth I would give him my brilliant moments. I would sacrifice the springs of the day to his glory. He shall have the best of my powers. I do so often put my whole self into my pleasures, and only a fragment into my worship. My sacrifice is not a 'whole burnt offering.' Lord, 'take my all.' Graciously incline me to consecrate my best."—J. H. Jowett.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

Surplus War Stock Sold

British Supplies On Sale Since Armistice Finally Disposed Of

British war supplies, valued at nearly \$3,500,000,000, which have been on sale ever since the Armistice, have now been finally cleared up, Charles E. Lyon, Assistant Commercial Attache at London, has informed the Department of Commerce at Washington: Everything was put up for sale, from packages of pins to a \$25,000,000 motor truck plant. Aeroplanes went most slowly of all. Poison gas cartridges and other forms of munitions were not sold but taken out to sea and dumped overboard. \$25,000,000 worth being disposed of in this manner. Among the items disposed of were thousands of miles of railway lines in Belgium, Greece and Palestine. The British Government sold its stock of pickled herrings, which were served to the Tommies as the "goldfish" was to American troops. The War Liquidation Board sold 800,000 barrels of them at something over \$5 a barrel.

Never stand on your dignity; there's nothing in the world so slipperly.

Minard's Liniment for scaly scalp.

FORT CHURCHILL TO BE TERMINUS OF THE H.B. ROAD

Nelson, Man.—Fort Churchill, the ancient port of the Hudson's Bay Company, which in the 18th century was a naval base and called Fort Prince of Wales, the picturesque ruins of which still stand, will be the terminus of the Hudson's Bay Railway.

Fort Churchill, situated at the mouth of the Churchill River, a great natural harbor, 477 miles from The Pas, Man., will be recommended to the Federal Government as the Hudson's Bay Railway port by Frederick Palmer, distinguished British engineer, who has just concluded a survey of both Fort Churchill and Port Nelson harbors.

Mr. Palmer, who will submit a preliminary report to the Federal Government during the present month, announced his decision to recommend Fort Churchill.

"It is a natural harbor in which practically unlimited shipping accommodations can be provided in the shortest time and at a minimum of cost," declared Mr. Palmer. "It is almost incomparably superior to Nelson in safety, cost of construction and economy of time."

Following Mr. Palmer's announcement, Hon. Charles A. Dunning, Minister of Railways and Canals, stated that the Government would act immediately on the British engineer's recommendation.

"Nature has given us a wonderful harbor at Churchill and it is the policy of the Government to develop and make use of the whole Hudson's Bay route as quickly as possible," said Mr. Dunning.

The Federal Department of Railways will proceed immediately to push forward work at Churchill from the sea, and the Canadian National Railways, acting for the department, will complete construction of the remaining railroad link as speedily as possible, Mr. Dunning announced.

Crop Report Encouraging

Under Favorable Conditions Yield May Exceed First Estimates

Ottawa.—The crop report of the Dominion Bureau of Statistics, based on condition of all field crops throughout Canada is excellent. The condition of spring wheat is numerically expressed as 195 per cent, of the ten year average, representing an anticipated yield of 15.6 bushels per acre and a total forecast for all wheat of 357,367,000 bushels from 22,335,777 acres.

Last year, at the corresponding date, the condition of spring wheat was reported at 92 per cent., representing an average yield per acre of 13.6 bushels and the total forecast for all wheat was then 316,960,000 bushels. The final estimate of yield for 1926 turned out to be 409,813,000 bushels.

Assuming that conditions this year remain favorable until time of harvesting, there appears to be grounds for expectation that the wheat crop may turn out to be more abundant than the forecast of 357,367,000 bushels now indicated by the condition at the end of July, the report says.

London To London

Airmen Selected

Captain Tully and Lieut. Medcalf Chosen To Make Flight

London, Ont.—Captain T. B. Tully, for the past several years superintendent of the Ontario Government air services, South St. Marie, with Lieut. James V. Medcalf, of the same service, have been chosen pilots for the London, Ont., to London, England, non-stop flight.

They signed their contracts with Charles Burns, donor of the \$25,000 prize for the flight, and left at once for Detroit to take charge of the Stinson Monoplane, scheduled to be completed and fully equipped with all navigation instruments in time for delivery in London, August 15.

The pilots hope to be ready for a take-off, if weather is favorable, within a week or so.

W. N. N. 1694

Settlers Under Group Plan Are Prospering

Progress Made During Summer Says Canada Colonization Official
Winnipeg.—On his return from an inspection tour of the settlements made by the Canada Colonization Association in the West, R. C. Duncan, assistant manager brings an account of good conditions.

Prospects in Alberta, Mr. Duncan says, are particularly bright. On the George Lane farm at Namaka, colonized under the auspices of the association by 36 families, the settlers expect to pay off \$50,000 of their indebtedness this year, and have taken out extra half insurance to protect their crop, which is the best in the history of that district.

Settlements made by the association in the Lethbridge district are so successful that it has been decided to increase them by 25 families this fall. One of the settlers has placed 120 acres in sugar beets, 50 acres in potatoes and 400 acres in wheat and other small grains, from which his returns this fall should be close to \$15,000. There are eight families now working for him.

The 14 families placed on the Bulman farm near Kelowna, in British Columbia, are doing well. Their onion crop has been harvested. A representative of the Canada Colonization Association will be placed in the Okanagan Valley to look further into opportunity for group settlement there.

Mr. Duncan is leaving this week for Ontario to investigate settlement possibilities in the tobacco fields of Essex county, where a large number of families have been temporarily placed.

Agricultural Statistics

Number Of Occupied Farms In West Is Less Than In 1921

Ottawa.—The Dominion Bureau of Statistics has issued a preliminary report on the agricultural statistics of the provinces of Manitoba, Saskatchewan and Alberta, as shown by the quinquennial census taken in June, 1926.

The report showed a decrease in the number of occupied farms in all three provinces over the year 1921, when the last census was taken. The 1926 census showed 53,251 occupied farms in Manitoba as compared with 53,252 in 1921; 117,787 occupied farms in Saskatchewan as compared with 119,451, and 77,130 in Alberta as compared with 82,954.

Total acreages occupied as farms land with 1921 comparisons in brackets were shown as follows:

Manitoba, 14,414,597 (14,615,844); Saskatchewan, 45,944,965 (44,922,907).

Alberta, 28,572,931 (29,293,953). Improved farm land was shown as: Manitoba, 8,346,021 (8,057,823); Saskatchewan, 27,714,915 (25,937,401); Alberta, 13,294,156 (11,768,912).

Police Watching Garibaldi

Liverpool.—Col. Ricciotti Garibaldi arrived from Havana, Cuba, on the liner Oroya. He was given a registered address by the police and asked to remain there but is allowed full liberty. Col. Garibaldi was arrested for complicity in the Catalonian conspiracy in November, 1926. The formal charge was that of possessing arms illegally and he with Col. Macia, was sentenced to two months' imprisonment and fined \$3.

Penalty For Starting Grass Fire

Sacramento, Cal.—State forestry officials have been notified of a novel sentence to a careless smoker, who was responsible for starting a grass fire in Tehama County. He was by Justice of the Peace E. F. Lennon and under a decree Fred Robinson, 25, a laborer, will be prohibited from smoking for one year. Robinson consented to take the pledge and saved himself a fine.

Toronto Union Station Opened

Toronto.—Toronto's "new" union station, which for eight years has laid idle, completed but unused because of difficulties surrounding the erection of a viaduct in connection with it, was opened to the general public, and the old station, which has served as a terminal for more than 50 years, was thrown into the discard. From now on all trains will be operated from the new station.

TWO RADICALS AGAIN GRANTED BRIEF REPRIEVE

State Prison, Charleston, Mass.—Nicola Sacco and Bartolomeo Vanzetti again have been given a new lease on life.

The radicals, condemned to execute their crime of murder committed seven years ago, in the electric chair, have been granted a reprieve to and including August 22.

This announcement was made by Prison Warden William Hendry, following receipt of formal papers which empowered him to take this action.

Many times before these two radicals, whose case has aroused international interest as one of the most remarkable murder cases in the history of jurisprudence, have been within a few hours of death. Then out of the night would come the word that the forces working day and night in their interests again had been successful in staying the upraised hand of the law poised to claim revenge for two lives snuffed out away back in April, 1920. Such was the case again. History was just repeating itself.

And this dramatic climax to one of the most amazing legal battles ever fought came after defence counsel had almost given up hope—when they were about ready to admit that "no human power" could again stave off the fatal moment.

The voice which has been heard around the world, raised in loud and continual protest against the execution of Sacco and Vanzetti, brought glad news also to Celestino Madellos, sentenced to die with the radicals. This man, also convicted of murder, but his crime having no connection with that of the radicals, is included in the blanket respite. His name is almost unknown to the millions who raised their voices for Sacco and Vanzetti, yet he too benefited.

Epidemic In England Is Causing Anxiety

Cause Of Illness Among Children Cannot Be Determined

Bath, Eng.—An epidemic that is supposed to have resulted largely from the consumption of tainted ice cream, has affected more than 300 people, in Bath, Somerset, and the surrounding district. There is a great deal of anxiety over the outbreak, more particularly as a number of people who have not eaten the supposed infected ice cream, are ill from some mysterious cause.

The majority of those who are ill are children.

One child has died from convulsions caused by the unknown irritant.

Resents Betting Tax

National Sporting League May Have Candidate To Oppose Churchill

London.—Winston Churchill, chancellor of the exchequer, probably will be opposed by an Independent Conservative candidate in the Epping division of Essex in the next general election. The National Sporting League, as a protest against the imposition of the tax on betting, threatens to bring out a candidate against Mr. Churchill, who as chancellor of the exchequer, is largely responsible for the passing of the legislation imposing the tax.

May Build More Cruisers

U.S. Plans To Construct Ten In Next Five Years

Washington.—While no official statement has been made, it is understood here that in proposing a cruiser tonnage of from 250,000 to 300,000 at Geneva the American Government figured upon a maximum of eighteen 10,000-ton cruisers for this country.

Eight such craft now have been contracted for and the other ten undoubtedly will be authorized by congress in the near future. The speed with which they are to be built probably was one of the subjects discussed by President Coolidge and Secretary Wilbur at Rapid City.

Naval opinion here now is that two of these craft should be laid down each year spreading their construction over a five year period.

Eighteen 10,000-ton cruisers would total 180,000 tons which added to the 75,000 tons in the ten light cruisers of the Memphis type, now in commission, would give the United States a total of 255,000 tons.

Air Derby Fliers Killed

Badly Burned When Plane Burst Into Flames After Crash

San Diego, Cal.—Lieutenants Covell and R. W. Waggener, U.S. Navy, who left here in an aeroplane they had entered in the "Pole flight to Honolulu," were killed when the aeroplane crashed into Point Loma, near here.

The plane was destroyed in less than 15 minutes after they had left for Oakland airport, where they intended to take off in the flight to Honolulu. The plane burst into flames after it struck Point Loma.

Covell's body was found in the cockpit of the plane and was charred beyond recognition. Identification was made from a wallet that was found in a pocket of his coat. Waggener's body was later recovered from the wreckage, and also was badly burned. Waggener is believed to have endeavored to jump clear of the plane as it fell, but was caught in the wreckage. The aviators had drawn number 13 in the race.

Attempted To Sell Dye Trust Secrets

Formulae and Contract Found In Possession Of Three Employees In Germany

Hochst, Germany.—Three employees of the German Dye Trust are alleged by the police to have been caught in an attempt to sell the manufacturing secrets of certain products to English interests.

The police say they found the formulae hidden in the men's socks. They also claim to have found a contract fixing the purchase price of the secrets at 900,000 marks (about \$207,000). The alleged contract also promised air passage to England, naturalization there, and steady employment, with a share of the profits.

The law does not cover mere attempts of such nature, and the three men were released.

Climber and Guide Missing

Jasper Park.—E. H. Stark, experienced Alpine climber and photographer of Vancouver, and Fred Routh, Swiss guide of Jasper, are believed to have lost their lives in the Tonquin Valley when attempting the ascent of Redoubt Peak, a section of the Rampart Range in that part of the country.

TWO PREMIERS MEET

Right Hon. Stanley Baldwin, Premier of Great Britain, and Rt. Hon. Wm. L. Mackenzie King, Premier of Canada.

TRADE OUTLOOK IN CANADA IS VERY FAVORABLE

Calgary.—That the general industrial transportation and agricultural outlook from reports reaching him from all parts of Canada was on the whole excellent and would further improve as the market for Canadian products was widened, was the statement made here by E. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway.

"An important factor in the trade condition will be a steadily increasing population," he said. "The transportation companies, of course, only reflect the general conditions of the country and compared with last year, their gross earnings are higher but increased costs beyond their control have resulted in lower net earnings. The Canadian transportation companies are not yet being paid compensation for the important public services they are, I think, performing. As to agricultural conditions, a great deal will depend on the weather that will prevail during the next ten days or two weeks. If the conditions are favorable, another substantial contribution to the country's progress will be made."

"What are your impressions of the benefits Canada will derive from the recent visit of Their Royal Highnesses and Prime Minister Baldwin?" Mr. Beatty was asked.

"The benefits which Canada will derive cannot help but be very great and far reaching," he said. "Canadianians are always glad to see Their Royal Highnesses and to them the Prince of Wales is almost as one of themselves. The unquestioned loyalty of our people needs no confirmation but we are particularly fond to note that on the occasion of the celebration of the diamond jubilee of Confederation representatives of the reigning house of Great Britain and the Prime Minister of that country were here to participate in it. The impressive character of the public celebrations have had a pronounced effect on our people, particularly on the younger generation, and the realization of what this country has done cannot but improve the morale of our people and increase the strength of our growing national sentiment."

Frustrate Conspiracy To Liberate Prisoners

Milwaukee Jailer Found Two Bars Sawed Through

Milwaukee, Wis.—What county officials said was a conspiracy to liberate 62 prisoners in the county jail was frustrated when a jailer discovered that two bars of a first floor cell had been sawed nearly through and a third bar far enough so that work could have been completed within a few minutes.

Prisoners, questioned by Sheriff Charles Schaffitz, said a woman had supplied the saws, and that she was to have smuggled firearms so that prisoners might shoot their way out if necessary.

Floods Damage India's Crops

London.—Dispatches received in Bombay from the district of Gujara, Bombay presidency, British India, and forwarded by Rance, say floods are reported to have damaged or destroyed 50 per cent of the cotton crop, 90 per cent of the tobacco and a large proportion of the foodcrops of Broach. The cotton loss in the Gujara and Kathiawar districts is estimated at 150,000 bales.

Premier Oliver Still Ill

Victoria.—The condition of Premier John Oliver, who underwent an operation some time ago, continues with little change. Since he met his supporters in the legislature some weeks ago and announced his readiness to retire, he has not visited his office in the parliament buildings. Occasionally he is able to take a short automobile drive, but is confined to his bed a great deal.

Britain's Problem

Outside of the British flag, it is estimated that there are but 18,000,000 white people for the 13,000,000 square miles comprising the British Empire. No other empire has ever had such a problem to deal with or handled it more successfully.

The Story Of Garnet Wheat Epitomises History Of Wheat Breeding Work In Canada

Garnet wheat has in the last few years been very widely discussed and enthusiastic journalists and others have given it a reputation which it will find difficult to sustain. However, there has just been published a bulletin, written by Mr. L. H. Newman, Dominion Cerealist, which gives an authoritative and unbiased statement of what actually is known regarding the performance and quality of this new wheat in comparison with other varieties.

Garnet has a hardy ancestry. Its pedigree is traced back to Red Fife, the old Canadian standard variety. Ladoga from the Lake Ladoga region in Russia, 600 miles further north than is the city of Winnipeg. Onega from near Archangel in Russia, one of the most northerly wheat growing districts in the world, and Cebun from 11,000 feet above sea level in the Himalayas.

From the cross between Red Fife and Ladoga came Preston which combined some of the good milling qualities of the Canadian Fife with the early ripening of the Russian wheat. Crossing Onega and Cebun resulted in a wheat named Early Riga, a quick maturing variety giving a good quality flour. In 1905 a crossing between a strain of Preston, called Preston A, and a strain of Early Riga, called Riga M, resulted in the now famous Garnet wheat.

It was not until 1911 that the new wheat was included in the regular test plots at the Central Farm, and in 1919 it began to be tested at the branch farms in the prairie provinces. The present Dominion Cerealist in taking stock of all the varieties on test in 1923 found Garnet to be especially promising and singled it out with one or two other varieties for special consideration. By the spring of 1925 it had become reasonably clear that Garnet was a high yielding wheat of good milling and baking qualities, and it was decided to try it out under field conditions. In 1926, 14,000 bushels of seed were used in these field trials, and the results fully justified expectations.

The story of Garnet wheat thus epitomises the history of wheat breeding work as conducted at the Central Farm, at Ottawa, during the past 40 years, and compels an appreciation of the man who conceived the programme followed—Dr. William Saunders, the first Director of the Farms System. This programme has been ably carried out by his successor, the discoverer of Marquis wheat, and by the present Dominion Cerealist.

The bulletin, which contains a wealth of detail about the new wheat may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

High Milk Production

Holstein Herd At Alberta Government Farm Makes Good Showing

The Holstein herd at the Alberta Provincial government farm at Oliver is giving quite a good account of itself, not alone in the production of milk but in milk of high fat content. One of the herd bulls, Sir Sylvia Car Born 53,778, was bred by the Hon. A. C. Hardy, of Brockville, Ontario. 12 cows of his get recently showed a monthly average of 3.9 on daily test, the highest individual average being 4.12 head, the rest of various other ages, showed an average of 3.3.

Hengerveld Pearl Nephile 5th, 61668, one of the cows in the herd, has a record of 18,203 pounds of milk testing on an average 3.95 when she was three years old. This herd is milked three times daily.

Develop Sodium Sulphate Deposit

John M. Seale, of Edmonton, in association with Horace Freeman, well-known industrial chemist, is progressing with the organization of a company to develop the sodium sulphate deposit at Olan on the Canadian National Transcontinental line in Central Saskatchewan.

Girl: "Well, Dad, I'm engaged."
Pa: "You don't mean it."
Girl: "Of course not, but it's lot of fun."

W N U 1694

Gold In Canada

Precious Metal Found In Every Province In Canada, Save One

Gold has been found in every province of Canada except Prince Edward Island. The first recorded discovery was made in 1824 on the Gilbert River, 50 miles south of Quebec city. Placer mining operations commenced here in 1847 and intermittent operations have been carried on ever since. Placer discoveries were made in Ontario, in British Columbia, and in Yukon Territory at much later dates. Lode mining for gold began at Tangle River, Nova Scotia, in 1858. Last year the total production of gold in Canada was 1,729,000 ounces, valued at \$35,749,000. Approximately 85 per cent. of this production was obtained from mines in northern Ontario, and 14 per cent. from British Columbia.

Austria Wants Canadian Flour

Discovers That Canadian Article Makes More and Better Bread

"Austrian bakers have discovered that with the use of Canadian flour they can make more and better bread. The prohibition of night baking also favors the employment of fast-baking flour," says the Commercial Intelligence Journal, Ottawa. Frederick Franke, Austrian Consul here, says his country is anticipating with gratification a trade treaty with Canada; for, while the war reduced Austria's population from 54,000,000 to 6,000,000 the city of Vienna has still 2,000,000 people to feed.

Egg-Grading Brings Results

Canada Has Reached High Place In Poultry Industry

At session in Ottawa the World Poultry Congress heard that Canada led the world in the consumption of eggs, having established a record of 337 per annum or very nearly one egg daily throughout the year for every one of the inhabitants, men, women and children. Recent statistics show that the utmost the United States could achieve in that direction was 207, Belgium beating it out by reporting 213. Great Britain gets along with the modest number of 110, ahead of Norway, Sweden and Denmark, but behind Germany and France.

The high place taken by Canada in the poultry industry is largely due to the remarkable activity shown by the Federal and Provincial Departments of Agriculture and to the educational work of institutions like the Macdonald Agricultural College in Montreal and the Ontario Agricultural College at Guelph. To these agencies is mainly attributable the higher standard of stock as well as the improved methods of feeding and marketing now prevailing. The aggregate annual production of poultry and eggs in the Dominion is now placed at \$50,000,000, revealing the poultry industry as an adjunct of agriculture of national importance.

The Canadian Produce Association has also greatly aided the industry by adopting a standard of egg-grading, now legally effective, on the basis of inspection of exports and inter-provincial shipments. The improvement in quality and stability has become so apparent in the export trade that the better grades of Canadian products brought as much as twenty cents a dozen higher than the nearest competitor on the Glasgow market. This simply repeats what has followed the standardization of other commodities. Producers who oppose a system necessary to secure and hold the confidence of foreign markets are injuring no one more than themselves.

Ontario Wheat Pool Active

It is expected that between three and four million bushels of grain grown in Ontario will be handled in connection with the wheat pools of the Western Provinces, as a result of conferences which have taken place between representatives of the various interests. Ontario farmers, by co-operating with the farmers in Western Canada, will be in a position to meet the needs of any market under the best of conditions. The Pool will be operated by a central board upon which will be two representatives from each province.

Slavery recently has been abolished in the state of Kalat, Baluchistan, a dependency of India, where it has been in force since the 6th century B.C.

Seeds From Western Trees Are Being Sent Abroad To Reforest The Empire

Favourable Employment Situation

General Improvement Is Registered In All Industries

There were pronounced increases in employment at the beginning of July, according to statements tabulated by the Dominion Bureau of Statistics from 6,137 firms employing 396,956 workers, or 11,866 more than on June 1. This increase which was larger than on July 1 of any other year of the record brought the index number to 108.4, as compared with 105.9 in the preceding month. The situation continues to be decidedly more favorable than in any other month of the years since 1920.

General improvement was registered in all industries except logging, which showed seasonal curtailment. The largest gains were reported in construction, in which they were greater than on July 1 of any other year of the record.

The trend was favorable in all provinces, the most noteworthy expansion taking place in the Maritime Provinces and Quebec.

Pure Seed

Canada's Seed Grading System Held In High Regard

Commerce in seeds in Canada is conducted on a basis of legally defined grades, and the quality of seed sold must conform to prescribed grade definitions. This involves responsible duties for the inspectors of the Dominion Seed Branch, Department of Agriculture, who grade all agricultural seed and a large part of the field root and garden vegetable seeds required for domestic use and for export. According to the latest annual report of the Minister of Agriculture 22,617 control samples were examined and graded at laboratory points during the fiscal year 1925-26. The total quantity of seed represented by these samples amounted to several millions of bushels. That the system followed in this country is sound is shown by the recognition given, on foreign markets to Canadian seed offered under official sale and grade names.

Moving Whole Town

The whole town of Potosi, houses and all, is going to take a ride to a new townsite near Dana, Cal. There are 50 houses which will be placed on flatcars by a crane, and housewives may continue cooking and washing while the trip is in progress. The lumber company owning the buildings is moving to a different location.

Several years ago the British reforestation authorities suggested to the Forest Service of the Dominion Department of the Interior that it could materially assist their work by the collection of seeds of western trees. The suggestion was acted upon and now, in addition to the large seed-extraction plant at Vancouver where seeds from all parts of British Columbia are collected, three smaller plants are maintained. These latter are located at Rocky Mountain House in Alberta and at Indian Head and Prince Albert in Saskatchewan. Beside what is sent to Britain, seeds are supplied for experimental and reforestation work in the forest reserves and elsewhere.

Last year about 11,000 pounds or five and a half tons of seed were extracted in these establishments, about 1,500 pounds of this quantity being Sitka spruce. The old adage that "great oaks from little acorns grow" would have been even more pointed and suggestive had the illustration been drawn from that variety of Canadian tree. The acorn is comparatively large and conspicuous on the parent tree, but the seed of the Sitka spruce is only one-thousandth part of the weight of an acorn. This monarch of Canada's western sea-coast attains a height of from 160 to 180 feet and a diameter of from eight to twelve feet but the germ from which it springs is so small that it takes 300,000 or more to balance a pound weight.

Seed of the western cedar, the well-known source of shingles, weighs about the same. That of the Douglas fir, the giant of all the Canadian trees, weighs about one forty-thousandth of a pound. White pine, described by the Quebec Chronicle-Telegraph as once the standby of the eastern lumberman, still the choicest wood in the eastern forest, starts as a little seed weighing about 26,000 to the pound, and may attain a height of from 100 to 150 feet and a diameter of from 30 to 40 inches. White spruce, providing the timber used in greatest quantity by eastern lumbermen and pulp manufacturers, begins as a seed of which 120,000 are required to weigh a pound.

To give an idea of what this means, comparison may be made with some of the more familiar vegetable and weed seeds. A single Sitka spruce or western cedar seed weighs about as much as two dandelion seeds, about the same as a single seed of the carrot, chicory or mustard, and less than a single seed of garden cress or onion. Yet from these infinitesimal germs came the vast stands of forest that bulk so largely on the British Columbia landscape. They seem destined, too, to play a large part in the reforestation program of Great Britain. New Zealand has likewise taken a considerable quantity of Canadian seed for her reforestation work.

Many Applications Received

Saskatchewan Farmers Want To Register Name Of Home

A number of applications have been received by the Department of Agriculture for the registration of the names of homes, according to F. H. Auld, Deputy Minister of Agriculture, who says there are many farm homes in use in Saskatchewan which have not yet been registered. For the next two years the "Names of Homes Act" gives a certain amount of protection to those who are using names and have not registered them. After May 1, 1929, when the act has been two years in force no protest against the use of a registered name can be effective.

Was Easy To Fit

A doctor was finishing his round of the links when his small Negro caddy remarked, "Doctor, ain't you got some shoes up yonder in yo' locker you don't want? I needs some bad."

"Perhaps," said the doctor. "What size do you wear?"

"I dunno, suh, 'cause I ain't never bought none dater-way—I either kin get in 'em or I can't."

Many a blessing in disguise effectually escapes detection.

His Royal Highness stepping from the Canadian Pacific S. S. Empress of Australia to the tender which took him to the Kings Wharf at Quebec.

CHAPTER VI.—Continued.

"You'll come over early, get dressed, and I'll make you up a little; just a little rouge on your cheeks, and your eyes darkened a little. You will go out in the car with my driver, and at the proper time he will bring you in, and I will introduce you. You will dance with two or three and then come to me and tell me you are tired. There will be a great fuss then over you, but you will insist on going. Thomas will drive away with you and then bring you back to the back door. Manda will be in the secret, of course, and she will see that the doors are shut. No one will see you, and you'll go to her room, slip off the clothes, put on your own, wash off the rouge and powder, and come down and help to serve. Won't it be fun?"

Helmi's days following this were passed in a golden glow of expectation. The whole air around her, the chaste, unimpeachable air of Miss Abbie's kitchen, trembled and glittered with visions. Her little world was suddenly changed by the touch of clinging silks and the gleam of starchy eyes—and those her own! Her young soul was intoxicated with the new wine of beauty and adventure.

At the next Ladies' Aid Meeting Miss Abbie complained of Helmi's absent mindedness. "I declare," she said, "that Helmi girl of mine is bewitched. She gave the milkman bread tickets this morning, let the toast burn, and I heard her talking to her-

self. 'I am so verree tired I beg leave to withdraw,' she said, and by the air of her you would think she was a queen upon her throne. I asked her if the girls were putting up a play or something, but she said not. But she is in great glee over something. I hope she's not going to be taken down; she's a grand girl, only for this, and this has all come on so suddenly."

The day of the party came. Helmi asked Miss Abbie, if she might go over early to help Mrs. St. John, a request which was cheerfully granted, and with a heart as light as thistle-down Helmi ran over the road.

It was a spicy day in late September, when Indian summer hangs its banners on the trees. The asters and dahlias, now at their best, lifted their proud heads to the sun, reveling in the rich amber sunshine. Laura Slocom dahlias, creamy and waxen, with tips of burnt orange, bordered the path, so luxuriant in color, so utterly profligate and over powering Helmi could not pass them without paying them the homage of her beauty-loving heart. They were so lovely they hurt her some way. She wanted everyone to see them. Next day would be dahlia show and they would be taken to the big ballroom in the hotel, where prizes would be awarded.

Dressed in her neat gingham dress, with low-heeled brown oxfords, brown stockings, her golden hair in neat rolls, Helmi looked like a favored child in some well-to-do family. Her heart sang with happiness. She was getting on; Canada was very good to her. She was learning, too. She could now speak over the telephone, buy things at the grocery, and one laughed at her accent. Miss Abbie was pleased with her and would pay her real wages next month, and all the girls were nice to her. Next meeting she was going to sing a Finnish song.

Helmi, as always, had come over early. Mrs. St. John would not be through with her sleep yet. So she dozed happily at the gate, with dreamy eyes. The birds in the golden cages were hung outside, and by their rapturous singing had attracted a flock of wild canaries that were fluttering now over the caragana hedge, trying to get a hearing with their aristocratic kinfolk. Helmi wondered what they were saying. She wondered if the caged birds grieved for freedom and the upper air when they saw their joyous brothers skimming past so light of wing, so happy in the sunshine. Yet there was no trace of sorrow in the caged birds' song, which mounted higher and higher. They were thinking perhaps of the bitter winds of winter, which held no terrors for them, for they were safe and warm, cared for, sheltered, fed, and yet birds were made for freedom, for unfettered flights, blue skies, mountain peaks. Cakes brought safety; the open air held danger. There you are—choose!

Helmi stretched her strong young arms and breathed the perfumed air. "I will take the open air and danger!" she said.

Looking again at the riot of color the garden held, crimson and lemon and glittering gold, Helmi broke into her own tongue. "Here it is!" she said, "my picture! Aunt's Flower Garden! It has come true! It was not only a picture drawn on paper; it was a promise—a true promise." Gratitude filled her eyes with happy tears. God was very good. A desire to speak to God was on her. She looked up to the sky and wished she could see Him just for one little minute. Then the words came, the words of the covenant she had made with Him; "Cherish health; seek truth; know God; serve others."

Then in her loyal heart Helmi prayed to God to let Aunt Lili know. Surely He would. Aunt Lili was so good—and she would be glad to know Helmi had found the Garden.

Anyway, when she went to heaven herself she would tell Aunt Lili, and she would be sure to go to heaven now. She was going to be such a lovely lady no one could keep her out any more than they could keep out Mrs. St. John, and besides, she would be so good to poor girls, everyone would love her.

She would bring out Finn girls—a ship load of them—and make lessons for them on the boat, and show them how to make dresses and do their hair, make stylish coats and say stylish English words. She would drive her own car going to see her Finn girls, and would teach them nice yells like Canadian girls make, and have nice suppers and give them copies of the Blue and Gold Book.

Lost in the pleasant dream, Helmi did not notice that a cloud had come over the sun and a chill had fallen. A drab little wind, with an ugly jagged edge on it, came twisting across the road blowing dust in her eyes. She looked up, Aunt's flower garden had faded, and with it the vision splended.

A sudden chill fell on Helmi's heart. Like most of her countrymen, she was superstitious, and she shuddered now with a sense of dread. Shivering she went into the house.

Seeing no one around, Helmi ran upstairs. Her friend was sick, maybe. That was the trouble which was coming.

In a darkened room, smelling heavily of some strange odor, Helmi found her lovely lady lying with face white and drawn, her eyes burning like Aunt Lili's had been. Helmi's heart was sick with fear. Was she to lose the flower garden again?

"Oh, Mrs. St. John, what is?" Helmi's English grew panicky.

"I will be all right, Helmi," her friend's ready voice reassured her. "You can help me. Will you go down town for me?"

"O yes, I go—anywhere," whispered Helmi, frightened by her friend's ghastly pallor; "I get doctor—he will get medicine."

Mrs. St. John's hand flew up in an imperative gesture. "You'll do as your are told, Helmi! I do not want the doctor."

The angry tone brought tears to Helmi's eyes.

Mrs. St. John's voice softened. "Don't mind me, Helmi, I'm so sick. The doctor wouldn't understand, and he would be cross."

Helmi grew more mystified.

"Listen, dear, you are my best little friend, I can trust you. Never tell. Helmi, I have a bad heart, and only one medicine can make me well." She paused a minute, and Helmi could feel her burning eyes on her face in pained entreaty.

"Can I get?" asked Helmi.

CHOLERA, CRAMPS, PAINS IN THE STOMACH RELIEVED BY

Mrs. D. Leavitt, Back Bay, N.B., writes:—"Last summer my children were very ill with cholera and suffered severely from cramps and pains in their stomachs. I tried several remedies, but nothing seemed to do them any good. A friend of mine told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle and gave them a few doses and they soon found relief. Now I will never be without it in the summer months."

Don't Accept a Substitute

This preparation has been on the market for 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

"Yes, dear, you can. Go down town—here's the address, ask for Sam. He's a doctor, a Chinese doctor, that's why we mustn't tell. Dr. St. John would be angry. Doctors often hate each other. Dr. Sam will give you a little box for me. Just say a lady sent you. Don't say my name Helmi. And never tell—Oh, Helmi, I will love you if you'll never tell. I must have taken my box—who else—think he knows—the doctor for he Sam always sends it with the laundryman, but today the doctor was here. I am so afraid, Helmi. Did you take my box, Helmi?"

Helmi's eyes went wide with terror.

"No, no, I'm crazy with pain. Go, Helmi, and be quick and never tell. Helmi promise me; if you tell I will die."

(To Be Continued.)

Little Helps For This Week

By thy words thou shalt be justified, and by thy words thou shalt be condemned.—Matt. xii. 37.

Words are mighty, words are living; Serpents with their venomous stings, Or bright angels crowding round us, With heaven's light upon their wings.

Every word has its own spirit, True or false that never dies; Every word man's lips have uttered, Echoes in God's skies.

—Adelaide Anne Proctor.

The evil word—and oh, remember this—is a step, a long step, beyond the evil thought; and it is a step toward the precipice's edge.

—Frederic W. Farrar.

Remember that every word you utter wings its way to the throne of God, and is to affect the condition of your soul forever.

—Todd.

Ivory Making Eskimos Rich

Long Buried Tusks Found On Islands In Behring Sea

An ivory harvest arrived at Tacoma recently on the schooner Boxer, which represented an unintentional bequest from long dead Eskimos to the present generation. For ages natives of the islands in Behring Sea took walrus, ate the blubber and threw the gleaming white tusks on the dump or kitchen midden, back of their igloos.

The piles accumulated during the centuries until the white man came with his trading schooners and eagerly bought the tusks of freshly-killed walrus. The Eskimos of today, remembering the wasteful habits of their ancestors, promptly began to sink mines on the sites of ancient camps and villages. Each year for four years on St. Lawrence Island alone they have dug out thousands of dollars worth of fossil ivory.

The up-to-date and semi-educated Eskimos do not waste time going far to seaparing their meat, they simply mine the buried treasure, sell it and buy the white man's food with the profits.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

Wedded To a Tree

Blind Girl in India Is Tragic Figure
A blind girl of twelve gropes her way with extended hand at dusk each night to a sacred tree at Bardoli, India, and puts her arms around it, crying softly over the tragedy of her life. The tree is her husband under Hindu law and she can never have another. When she was six years old the child had smallpox. Her face was disfigured and she was blinded. Her father, deciding no man would ever want to marry her, and not desiring to suffer the stigma of having an unmarried daughter, had her married with full Hindu rites, to the tree. There was a formal wedding feast to celebrate the event.

Ontario Main Source Of Cobalt

For the past twenty years the Cobalt silver area of Canada has been the main source of the world's supply of cobalt. In the period 1907-1923, both years included, the total output of cobalt was 21,843,761 pounds.

Why Gum-Dipped Mileage Costs Less "Per Mile"

The demand from car owners for Firestone Gum-Dipped Tires has given Firestone Dealers a large increase in volume that enables them to sell these tires to you at the lowest prices in the history of the industry.

The Firestone Balloon Tread, scientifically designed three years ago, and unchanged today has the wear-resisting qualities that give thousands of extra miles.

This tread must be placed on a carcass that has the qualifications to withstand terrific flexing. The Firestone carcass is made of cords dipped in rubber solution which not only saturates and insulates every fibre of every cord, but unifies sidewalls with carcass, eliminating any possibility of separation under the extreme flexing of low-pressure tires.

The Firestone Dealer in your locality will gladly explain the Gum-Dipping process, the scientifically designed tire tread, and other advantages that only Gum-Dipped Tires can give. See him today.

NO BETTER MEDICINE FOR LITTLE ONES

Is What Thousands Of Mothers Say Of Baby's Own Tablets

A medicine for the baby or growing child—one that the mother can feel assured is absolutely safe as well as efficient—is found in Baby's Own Tablets. The Tablets are praised by thousands of mothers throughout the country. These mothers have found by actual experience that there is no other medicine for little ones to equal them. Once a mother has used them for her children she will use nothing else. Concerning them Mrs. Charles Platt, Tancock Island, N.S., writes: "I have ten children, the baby being just six months old. I have used Baby's Own Tablets for them for the past 29 years and can truthfully say that I know of no better medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so."

Baby's Own Tablets are sold by all medicine dealers or will be mailed upon receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

In the course of a month a caterpillar will devour 6,000 times its own weight in food. It will take an average man three months before he eats a quantity of food equal to his own weight.

TROUBLED WITH RASH ON FACE

Itching Was Terrible. Cuticura Healed.

"My trouble began with a severe rash on my face which for about six weeks caused a terrible itching, burning sensation. The irritation caused me to scratch, and scratching caused sore eruptions which covered my face. My face was disfigured, and the trouble lasted about four months."

"I tried other remedies but they seemed to make the trouble worse. I sent for a free sample of Cuticura Soap and Ointment and got relief after using it. I purchased more, and in a short time I was healed." (Signed) Miss Annie E. McCluskey, Box 113, Grand Falls, N. B.

Use Cuticura to clear your skin. Sample Each Free by Mail. Address: Canadian Depot, "Ranbros Ltd., Montreal." Price, Soap 25¢, Ointment 25¢ and 50¢, 14¢ each 50¢. Cuticura Shaving Stick 25¢.

PAINS ALL OVER BODY

Two More Cases of Feminine Illness Relieved by Lydia E. Pinkham's Vegetable Compound

Barrington, N. S.—"I had terrible feelings, headaches, back and side aches and pains all over my body. I would have to go to bed every month and nothing would do me good. My husband and my father did my work for me as I have two children and we have quite a big place. I read in the paper about Lydia E. Pinkham's Vegetable Compound, and then got a little book about it through the mail, and my husband sent to Eaton's and got me a bottle, and then we got more from the store. I am feeling fine now and do all my work and am able to go out around more. I tell my friends it is Lydia E. Pinkham's Vegetable Compound that makes me feel so well."—Mrs. VICTOR RICHARDSON, Barrington, Nova Scotia.

Dull Pains in Back

St. Thomas, Ont.—"I took four bottles of Lydia E. Pinkham's Vegetable Compound and found great relief from the dull, heavy pains in the small of my back and the weakness from which I suffered for five years after my boy was born. After taking the Vegetable Compound and using Lydia E. Pinkham's Sanative Wash I am feeling better than I have for the past seven years, and advise my friends to take it."—Mrs. F. JOHNSON, 49 Moore Street, St. Thomas, Ont. C
